PERSONAL PROFILE

Second Year Computer Science student with proficiency in Python and a developing focus on artificial intelligence, machine learning, and user-centred design. I take a structured and analytical approach to problem-solving, supported by both academic study and independent technical projects. Through freelance design work and customer-facing roles, I have developed a well-rounded skill set that integrates technical capability, strong attention to detail, and clear, professional communication. I am committed to further advancing my expertise and contributing effectively within technical, data-driven environments.

EDUCATION

Aston University — BSc (Hons) Computer Science
2025 – 2029
• Relevant modules: Programming (Python), AI & Data Science Foundations, Digital Systems, Databases, Cybersecurity, Mathematics for Digital Science and Human-Computer Interaction (HCI).

Maiden Erlegh School — A-Levels
2022 – 2024
• AQA Business – Grade C
• AQA Sociology – Grade B
• OCR Cambridge Technical Sport and Physical Activity – Distinction* (A*)

Maiden Erlegh School — GCSEs
2017 – 2022
• 10 Subjects including Mathematics (6) , English Language (5), English Literature (6), Combined Science (6-5), Cambridge iMedia (Distinction) and Business (6).

EXPERIENCE

Overnight Customer Service Assistant – Shell, Loddon Bridge Service Station
Jan 2025 - Sept 2025
• Operated the store independently during night shifts, assisting customers with shop and forecourt enquiries and accurately handling transactions.
• Received fuel and stock deliveries, completing documentation and ensuring correct storage, rotation and compliance..
• Maintained site safety through regular forecourt checks and kiosk monitoring, managing access and

security procedures.
• Completed administrative tasks, including refusal-of-sale forms, incident logs, and compliance documentation.
• Resolved operational issues such as payment terminal failures, freezer malfunctions, and stock discrepancies, escalating when necessary.

Royal Mail Delivery Worker (Seasonal) — Reading East Office
Dec 2024 - Jan 2025
• Delivered letters and parcels accurately and on time across allocated routes.
• Planned efficient delivery sequences by determining the optimal order of roads and residences.
• Organised and prepared daily delivery loads, ensuring correct handling and efficient workflow.
• Consistently upheld Royal Mail's safety, security and customer service standards.

Team Member — KFC, Chalfont Reading
Dec 2022 – Dec 2023
• Operated POS systems accurately while processing customer orders and payments.
• Worked across Front of House (FOH) and Middle of House (MOH), supporting service flow and order preparation.
• Regularly met KFC's two-minute service target by preparing and handing out orders efficiently.
• Assisted with end-of-day cash counts and reconciliation alongside management.

Freelance Graphic & UI/UX Designer — Self Employed
2019 – 2024
• Created logos, branding assets, posters, and marketing materials for individual clients and small businesses.
• Designed UI layouts and interactive prototypes using Figma and Adobe XD, applying modern design principles and user-focused layouts.
• Produced professional digital graphics using Photoshop and Illustrator, ensuring brand consistency and high-quality visual outcomes.
• Managed full product lifecycles, including requirements gathering, concept development, revisions, and final delivery.
• Built a diverse portfolio of interface and graphic design work (currently under maintenance).

KEY SKILLS

• Technical: Python, foundational AI and data science concepts, computational thinking, basic databases, Excel for data handling, operational problem solving.
• Communication: Clear and concise written and verbal communication developed through customer-facing roles and formal documentation
• Analytical: Logical reasoning from academic study combined with real-world problem solving, including route optimisation and diagnosing minor technical issues.
• Teamwork / Leadership: Proven ability to collaborate effectively, with independence demonstrated through managing a Shell store alone during night shifts.

PROJECTS

AI Qur'an Tuition Application — *Started September 2025*
Developing an AI-powered Quran learning application capable of analysing user recitation and providing corrective feedback. Current work includes UI/UX design, initial implementation planning, technical architecture development, and research into speech recognition models such as Whisper and wav2vec2; with a planned tech stack including Dart/Flutter, TypeScript/JavaScript, Supabase (SQL), and Python for AI components. Building the foundation for user onboarding, audio processing, and personalised feedback features.

CERTIFICATIONS

• IBM Python for Data Science, AI & Development – *Completed 2025*

ONGOING & UPCOMING DEVELOPMENT

• Google Data Analytics Certificate – *Expected Completion Feb 2026*
• Machine Learning Specialisation (Stanford / Andrew Ng) – *Expected Completion June 2026*
• Advanced SQL & Data Visualisation - *Expected Completion Sept 2026*
• TensorFlow or PyTorch Developer Certificate – *Expected Completion Dec 2026*
• Databricks Data Engineering Associate / AWS Cloud Practitioner – *Expected Completion Mar 2027*
• MIT/Imperial Applied AI Programme – *Expected Completion Sept 2027*

INTERESTS

• Digital Design & UI/UX: Designing logos, graphics, and user interfaces from early teens; applying design principles to personal technical projects.
• Personal Technological Projects: Building small applications, exploring AI tools, and experimenting with new technologies in my free time.
• Football & Cricket: Active participation in team sports, supporting communication, discipline, and teamwork.
